I was paralyzed on 14th Jan 2004, Sankranti (New Year festival in Maharashtra) and admitted in the hospital a festival day.

To my shock my right side was affected, eventually doctors had detected my case as that of Belpalsy and was given wrong treatment and thus was following wrong medicines for a weeks time.

One evening my body's right side started stiffening and was rushed to hospital. Then doctors realized it was Paralysis, even after being admitted to good and best hospital, doctors detected it to be wrong case. Diabetic was added to Paralysis and my condition became worst. After a year due to massage and Yoga treatment and doctors medicine my body had started moving little but could not speak.

I had a paralytic stroke 3 years back and the condition was very bad as I could not speak properly. My right side was in a bad shape as a result I could not even lift a light weight material. I was introduced to Noni 4 months back by Mr. Victor D'costa.

After taking Noni for the last 4 months my speech has been improved beyond 90%. My right side strength has been improved considerably. Today I am able to walk more than 5 km a day, which was not possible before taking Noni. I used to suffer cluster phobia and very bad memory. Now both the conditions have improved beyond expectations.

Now I am able to face any crowd and do my work without others support.

I thank Indian Noni for my good health and I wish everybody consumes Noni and keep good health.

In March 2005, I had a sudden attack of dysentery followed by complete failure of nervous system, body pain, severe cough, cold etc.

After several tests, the Neuro specialist said that there is a blockage in spine for blood circulation and that it may even cause stroke.

I was not even able to get up from bed and I was completely bedridden.

I needed 2 persons help to take me even to toilet/ bath.

The medicines prescribed by Doctor resulted in side effects like high sugar, chronic pain in leg and body, sleeplessness, etc.
