My ailment started at the age of 40. It was a hereditary disease. I was suffering from Hormonal Imbalance and Muscular Pain on one Leg. I was unable to walk. My leg became thin and medicines had no effect upon this ailment.

After taking Noni, I am comparatively better and improving day by day.

I have started giving this drink to my children now so that they avoid a similar situation. Thus save my future generation from these diseases.

I thank Indian Noni and the people who have brought the excellent health enhancer to the masses of this country.

I wish more and more people to benefit from this drink.

Thank you Noni.
