I have been suffering from loose motion, loss of weight and general weakness for almost 12 years.

I am nearing 50 and had tried almost all medication available on this globe but all in vain.

At last, I got this juice called Indian Noni. Amazingly, my problem was solved. This excellent liquid has touched my life to live happily. Now I am free from the problem of loose motion.

I have put on weight and am leading an excellent life.

Indian Noni has given me a new life to live.

My baby Ms.Vishakha was generally a healthy child till 3.9.04. But in the morning of 04.09.04 between 2 – 3 AM she had a severe pain and suddenly there was bleeding from her nose. She vomited between 4 – 5 AM.

So we got her admitted in Hospital where doctor said, her blood platelet count is just 3000/cu.mm. After treatment for one month platelet count increased but very soon it decreased. What to do was the question?

Then our brother Dr.D.D.Shirsath suggested us to start taking Indian Noni. After having consumed 2 bottles, from 26,000/cu.mm her blood platelet count went to 2,30,000/cu.mm. From that day onward, she is normal and happy. Indian Noni is like a boon to us.

I am a 56 year old lady suffering with IBS for the past 20 yrs. It had crippled my life.

I was scared of eating anything because I was unable to bear the abdominal pain & loose motion.

My trips to all the Gastroenterologists in town turned futile.

With no hopes I went for my regular checkup to the diabetic doctor where he suggested me to try Indian Noni.

To my surprise, my abdominal pain decreased and the frequency of loose motions came down without any other medications.

I feel active & healthy as ever. Indian Noni has been a blessing in my life.
