Maharashtra-411033

I cannot move in the sun. If I go out in the sun I used to get headache, giddiness and loss of body fluids. Due to this I was not able to go out for the past 2 years. I had loss of appetite also and I developed ulcer in the stomach.

After using Noni I feel better now. I have started going out in day without any difficulty even upto Lonavala.

I am using Indian Noni for the past 3 months.

It is a blessed drink.

I thank Verma and Ghatol for introducing me Noni.
