Dist: Dhule-425408

I met with an accident in 1994 and was operated in the right knee. Since then I have knee pain. I had to apply pain balms/Iodex, etc on knee everynight before sleeping.

Throat problem was very serious in nature for me. When I used to eat oily foods during day time, my throat used to choke-up at night while sleeping.

Since 3 months I am drinking Indian Noni regularly. My knee pain totally disappeared and throat choke-up problem has also been solved.

Indian Noni is like "Amrit" juice.
