Phadke Road
Dombivli (W)

I had a severe problem two years back. I underwent a major operation of a tumour developed on my right thigh.

After the operation, doctor told my friends that I may have serious problem in the next four years. I was not offered any guarantee for my life.

At that time my family friend, Shri Rajesh Chandorkar introduced Noni juice to me. I am consuming Noni juice for the last 8 months, today my health is very good. I was not able to climb the railway steps before, but now I can climb a four storey building steps easily. Now the same Doctor says that I can live longer life up to 80 years.

Today my whole family drinks Noni and we are leading a happy and healthy life now.

Thanks to Indian Noni.
